WHEN WILL BE THE END OF NOW?

OUR FUTURE PREDICTED BY NATIONAL STATE SECURITY

Highly anticipated, confusing and extremely bizarre... The idea of having POSTRmagazine's future predicted by a fortune-teller was triggered at Full Moon Healing...

The jig is up. The cards are on the table and the future of POSTRmagazine is being as bright in the face. It appears we're doomed in every possible way according to the universe and medium D. Wolfert.

THE FUTURE IS NOW

THE KILLER CLOUD AND THE DEATH OF A MILLION MERCHANTS

When was the last time you rented a DVD? Go ahead, take your time. Think about it really hard. Remember the days when you were lured to the store by the promise of a new DVD. Remember the face of the guy who sat behind the counter warning himself on the electric radiator while you and your girlfriend... Do you remember which movie it was? The last one we rented was Evil Ed.

BITCOINS RULE EVERYTHING AROUND ME

The scenario above puts more money in the hands of fewer people and makes the rest of us more dependent on Adam Sanders' comedies that never end. It's a philosophical level that piracy and hacking will steadily evolve at the same pace - action and reaction. At the same time, the gradual erosion of the philosophical level of the global economy and the establishment of a global currency (for reasons of security, public health and safety) will be a gradual process.

RISE OF THE PANOPTICON - FULFILLING THE PROMISE OF DEMOCRACY

In the past, changes in the political system have more often than not been catalyzed by technological innovation. The most direct relationship to your luck with the dice in these first rounds - an unfortunate first few rolls of the dice will in all likelihood be a source of frustration, weeping, gnashing of teeth and eventually irreparable rifts in the family community.

Onwards, forever - crawling slowly into that great promise of the future that lay folded out before us, full of promises of better things to come. Forever bound we were to our present, our pasts dragging us down like iron shackles, passed down through generations - now at last we are blessed with the blessed curse of complete peace in complete poverty.

RECLAIM THE FUTURE

Oh yes - you will see the true face of your civilization when the Great Exodus comes. When the Ark finally leaves this place that is doomed by the science you worship, those left behind will become that missing link between Man and what comes after. Until you have seen the Ark, you have never existed and we will be erased from history.

A direct democracy is only possible if every voice in the village can be counted. Thanks to the internet, the world is now a village - start counting.

Monopoly is a classic family board game that is fun for all players involved for about two rounds. The level of enjoyment you can expect during the game is directly related to the roll of your luck with the dice in these first rounds - an unfortunate first few rolls of the dice will in all likelihood be a source of frustration, weeping, gnashing of teeth and eventually irreparable rifts in the family community.

OPPOSITION SPEAKS WITH OUTRAGE

In a press conference held on the steps of the Earth Senate in Delhi, opposition leader Vande Sharan was speaking in a furious display of outrage. The 67 year old leader of the Global Conservative Party gestulated wildly at the building behind him, accusing both the president and his electorate of believing in a geopolitical child's dream born from naive science fiction that has inevitably turned into a horribly real nightmare before adding that the president should not be allowed to pass.

THE DOOMED FUTURE OF POSTR MAGAZINE

At that point my journalistic curiosity was piqued about the nature of our relationship with National State Security. Back in 2009 I participated in investigations that were set up by the Belgian State Security. The investigation infiltrated in heavy crime investigations related to drugs or child prostitution. I'm so glad that chapter is closed and I'm not allowed to tell you anything about it. At the time the service briefed me that if I'd leak any of this information to journalists I would be arrested. "What are the odds? Somehow, the one day I was stumbled upon was controlled by the most secret government department in our country. Indeed, I'm roughly explaining our situation, the man tried to overwhelm us with all kinds of legal information such as the possibility of obtaining a passport that we're obliged to know our old password by heart. I know this information is something completely false. I'm not allowed to tell you anything about it. I'm obliged to share this information just to prevent people here in a negative atmosphere. I have to make you aware of the fact that you're obliged to know your civil rights. You can't imagine how many clients I have that don't know their own civil rights. So I just give you this as an advice but I can also see it in my cards."

GAZING INTO THE CRYSTAL BALL OF NATIONAL STATE SECURITY

Under the guise of an ordinary consular, we tried to approach a renowned clairvoyant in town to find out more about the future of this magazine. Out of a dozen of fortune-tellers we contacted, only one was able to immediately answer our call, which kind of startled us. After all, they should have known that we were about to call, shouldn't they? It only seemed to confirm our suspicion as there's a lot of fraud in this business. Besides, we at POSTRmagazine are anything but superstitious. How can we believe someone who claims to see the future in a set of tarot cards?

about cycling, how it would deliver us from the looming climate disaster, which makes roads filled with hulking automobiles that routinely killed people look like a crude petroleum-era relic. And since the cars were gone, the drones took over. There was an uncomfortable adjustment period where every other day you'd hear a story about some poor child who got their face slashed open by a chinese takeout-bot. But those brand of horror stories subsided soon after GPS identification cards were made mandatory for all. And when the techno-terror aspect of drones began to slip away and they took on a more ambivalent tone, your average joe started to clue into the advantages therein.
